1.1 Music21 패키지의 소개

- 1.1 Music21 패키지의 소개
  - Music21은 음악에 대한 질문에 빠르고 간단하게 답변 할 수 있도록 학자 등을 도와주는 도구 모음입니다.
  - 여기서는 음악을 연주하는 방법을 분석하고 인공지능으로 피아노를 연주 하는 방법을 학습한다.
  - Music 21의 MIT에서 시작 된 프로젝트로 시작되었다. MIT의 음악 학과는 Harvard, Smith 및 Mount Holyoke Colleges와 함께 이 툴킷을 개발하고 발전시켜왔다.
  - 이 시스템은 2008 년부터 사용되어 왔으며 지속적으로 성장하고 확장되고 있습니다. music21의 접근과 전통은 많은 이전 소프트웨어 시스템에서 사용되었습니다.
- Web site
  - http://web.mit.edu/music21/

1.2. Music 21 환경설정 설정

- Music 21 환경설정 설정
  - music 21 설치
    - pip install music21
  - 5선지 악보 패키지 설치
    - #xml 악보가 아닌 오선지 악보를 이용하기 위하여 MusicScore 패키지를 다운로드 받아서 설치한다.
    - https://musescore.org 에서 FreeDownload 클릭
    - MuseScore-3.5.2.3.. msi 실행

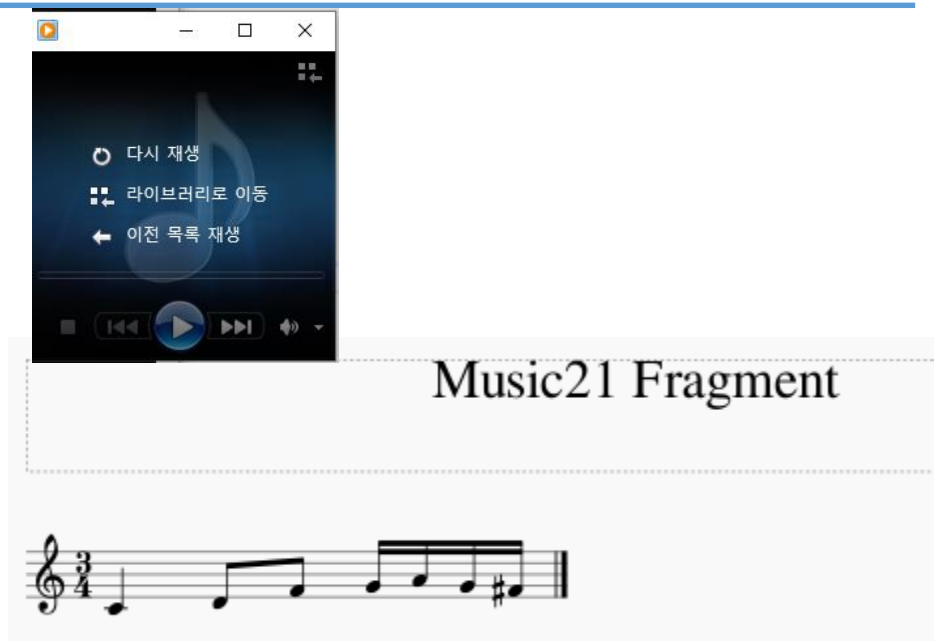
1.3. Music21 맛보기

```
import numpy as np
from music21 import *     #pip install music21

#xml 악보가 아닌 오선지 악보를 이용하기 위하여 MusicScore 패키지를 다운로드 받아서 설치한다.
# https://musescore.org 에서   FreeDownload
# MuseScore-3.5.2.3.. msi  실행

# path 설정 한번 만 샐행
us=environment.UserSettings()
us["musescoreDirectPNGPath"]=r"C:\Program Files\MuseScore 3\bin\MuseScore3.exe"
us["musicxmlPath"]=r"C:\Program Files\MuseScore 3\bin\MuseScore3.exe"

s=converter.parse("tinynotation: 3/4 c4 d8 f g16 a g f#") #<music21.stream.Part 0x21cacfd32c8>
s.show('midi', fp='sample.mid')          #음악재생 및 sample.mid로 저장
s.show()                                 #오선악보 출력
```



```
p=converter.parse("tinynotation: 3/4 c4 d8 f g16 a g f#") #<music21.stream.Part 0x21cacfd3cc8>
for n in list(p.flat.notes) :   #음표출력
      print("Note: {}{} {:0.1f}".format(n.pitch.name, n.pitch.octave, n.duration.quarterLength))
#Note: C4 1.0
#Note: D4 0.5
#Note: F4 0.5
#Note: G4 0.2
#Note: A4 0.2
#Note: G4 0.2
#Note: F#4 0.2
```

yjkim@hanbat.ac.kr

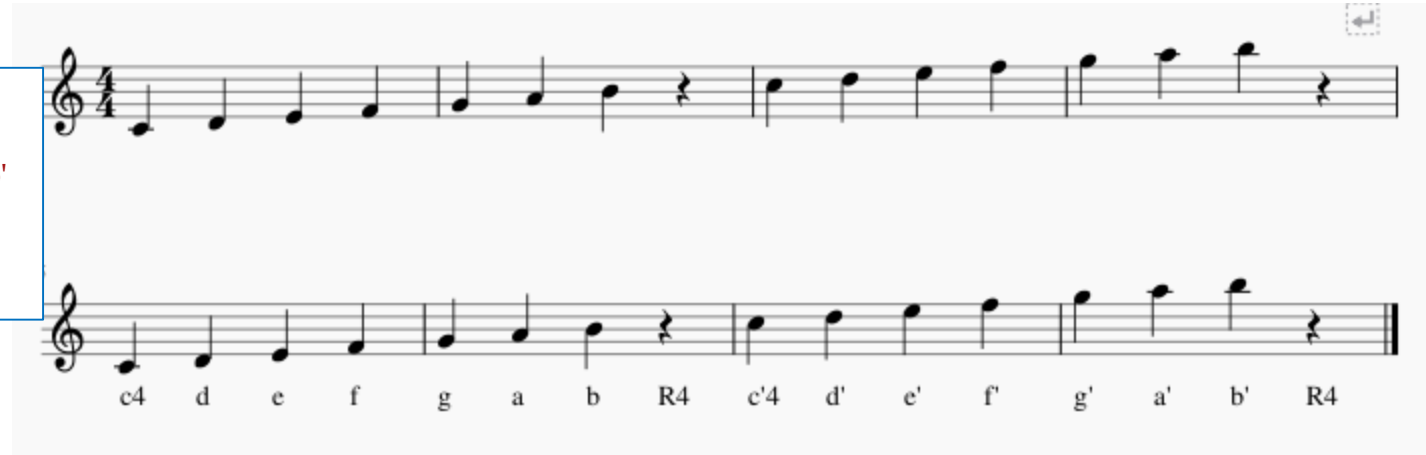
1.4. tinyNotation

```
from music21 import *

c= converter.parse("""tinynotation: 4/4
C4 D E F   G A B c   d e f g   a b r2
C4_C4 D_D E_E F_F G_G A_A B_B c_c d_d e_e f_f g_g a_a b_b r2
""")
c.show()
```

```
c= converter.parse("""tinynotation: 4/4
C4 D E F   G A B c
C4_C4 D_D E_E F_F G_G A_A B_B c_c
""")
c.show()
```

```
c= converter.parse("""tinynotation: 4/4
c4 d e f g a b r4                    c'4 d' e' f' g' a' b' r4
c4_c4 d_d e_e f_f g_g a_a b_b r4_R4          c'4_c'4 d'_d' e'_e' f'_f' g'_g' a'_a' b'_b'
r4_R4
""")
c.show()
```



1.4. tinyNotation(cont.)

```
c= converter.parse("""tinynotation: 4/4
c1d2 e2f2 g4 a4   b2 c'4 d'8 e'8   f'2  g'4 a'8 b'16  c"16
c1_c1d2_d2 e2_e2f2_f2 g4_g4 a4_a4   b2_b2 c'4_c'4 d'8_d'8 e'8_e'8   f'2_f'2
g'4_g'4 a'8_a'8 b'16_b'16  c"16_c"16
""")
c.show()
```

yjkim@hanbat.ac.kr

1.4. tinyNotation(cont.)

Here's a bunch of quarter notes in 4/4:

Notice that the last "c" is lowercase, while the rest of the notes are uppercase. Case determines octave: "C" = the c in bass clef (C3) while "c" = middle C (C4). Here are some other octaves:

Here's a bunch of quarter notes in 4/4:

```
s = converter.parse('tinyNotation: 4/4 C4 D4 E4 F4 G4 A4 B4 c4')
s.show()
```

Notice that the last "c" is lowercase, while the rest of the notes are uppercase. in bass clef (C3) while "c" = middle C (C4). Here are some other octaves:

```
s = converter.parse("tinyNotation: 3/4 CC4 C4 c4")
s.show()
```

```
s = converter.parse("tinyNotation: 3/4 c4 c'4 c''4")
s.show()
```

1.4. tinyNotation(cont.)

And, yes, CCC is the C below CC, and c''' is the c above c''. Remember when you use higher notes to make sure to enclose your string in double quotes, not single quotes.
Typing all those "4"s for each of the quarter notes got tedious, so if the number for a duration is omitted, then the next note uses the previous note's duration:

Periods signify dots, "r" is for a rest, and "~" indicates a tie:

Sharps, flats, and, if desired for clarity, naturals are indicated with #, - (not b) and, n, respectively:

A lyric syllable is specified by appending it after the note with an underscore:

```
s = converter.parse('tinyNotation: 4/4 C4 D E8 F G16 A B c')
s.show()
```

Periods signify dots, "r" is for a rest, and "~" indicates a tie:

```
s = converter.parse('tinyNotation: 4/4 C.4 D8~ D8 r c4')
s.show()
```

Sharps, flats, and, if desired for clarity, naturals are indicated with #, - (not b) and, n, respectively:

```
s = converter.parse('tinyNotation: 4/4 c4 c# c c## cn c- c-- c c1')
s.show()
```

A lyric syllable is specified by appending it after the note with an underscore:

```
s = converter.parse('tinyNotation: 4/4 c4 d2_Dee e4')
s.show()
```

1.4. tinyNotation(cont.)

And, finally, triplets are possible by enclosing the triplet notes in curly brackets along with a special trip prefix:

Okay – so what if you want to do something more complex? Apply an id to a note with the "=" tag, and then make changes to it using music21:

And that's how I use TinyNotation, about 90% of the time. But when I need to, I can make something more complex…

And, finally, triplets are possible by enclosing the triplet notes in curly

```
s = converter.parse('tinyNotation: 4/4 c4 trip{c8 d e} t
s.show()
```

Okay – so what if you want to do something more complex? Apply an changes to it using music21:

```
s = converter.parse('tinyNotation: 4/4 c4 d=id2 e f')
n = s.recurse().getElementById('id2')
ch = chord.Chord('D4 F#4 A4')
ch.style.color = 'pink'
n.activeSite.replace(n, ch)
s.show()
```

And that's how I use TinyNotation, about 90% of the time. But when I complex...

yjkim@hanbat.ac.kr

1.4. tinyNotation(cont.)

```
c=converter.parse("tinynotation: 4/4 g8 e8 e4 f8 d8 d4 c8 d8 e8 f8
g8 g8 g4 g8 e8 e8 e8 f8 d8 d4 c8 e8 g8 g8 e8 e8 e4")
c.show('midi',fp='나비야.mid')
c.show()
```

나비야.mid

```
c=converter.parse("""tinynotation: 4/4
  g4 g e8 f8 g4 a a g2          g4 c' e' d'8 c'8 d'.2 r4
  e'4 e'4 d' d' c' d'8 c'8 a4 a4   g4 g g e8 d8 c.2 r4
  d4 d e c  d4 d e g            g4 c' e' d'8 c'8 d'.2 r4
  e'4 e' d' d' c' d'8 c'8 a4 a4    g4 g g e8 d8 c.2 r4"
  """)
c.show('midi',fp='고향의봄.mid')
c.show()
```
